

# Jasmine Vo - Software Engineer

jasminepvo.dev • jasminepvo.dev@gmail.com

Atlanta, GA • linkedin.com/in/jasminepvo • github.com/jasminepvo • twitter.com/jasminepvo

## SUMMARY

Creative, detail-oriented, software engineer with a deep interest in products that impact the world. Skilled in HTML5, CSS, JavaScript, React, MongoDB, Express and Node. Proven track record of creating and implementing successful front and back end web applications that improve UI and increase conversions. Looking to bring my skills as a Software Engineer to a tech company with global reach.

## SKILLS

**Programming Languages:** JavaScript, C++ • Experience in: Python, SQL, R, Swift

**Technologies:** HTML5, CSS, React, Node, MongoDB, Express, AWS, Git, MySQL, MIPS

**Languages:** English and Vietnamese (Fluent)

## WORK EXPERIENCE

### 100Devs

July 2022 - Present

#### Software Engineer, Remote

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications with MVC architecture
- Applied agile methodologies like SCRUM for project management

#### Recent Projects:

- **StudyBoard (Fullstack Web App)** – Created by developers for developers to log in and apply pomodoro technique using a stopwatch feature to track working minutes spent developing or improving. Once logged, all tracked minutes will be pulled from the database and displayed & ranked on a leaderboard.
- **Chiro CMS (Fullstack Web App)** – Developing a contact management system built for small chiropractic businesses with REST API's integration. User portal has features such as authentication, appointment setting, calendar view, notifications and newsletter to be updated by the admin using an admin dashboard.
- **Other Projects:** StarGazers Society Web App with NASA API integration, Manifest Inspiration, AngelHope, Digital Business Card, Travel Journal, Meme Generator and many more

### Jasmine's Visionary

May 2020 - Present

#### Software Developer

Created full stack web applications and static websites for different clients across small and medium sized businesses. Also, consulted on user experience (UX), SEO and social media strategy. Some clients included:

- Phoummavong Chiropractic & Wellness – Built landing page that is connected to a user portal & CMS. Collaborated on user stories that resulted in 100% repeat appointments
- Nail Studio – Improved online presence with a 500+ new visits weekly and Google Maps API

## OPEN SOURCE

Frontend Developer - Hot Soup: Built contributors page for a free app that locates nearby soup kitchens

FullStack Developer - FitDevs: Develop leaderboard using data from twitter bot to rank users by minutes

## EDUCATION

### The University of Texas at Dallas | Richardson, TX

2018 - 2021

Completed 104 Credits towards B.S. in Computer Science

**Relevant Coursework:** Data Structures and Algorithms, Database Systems, Machine Learning, Software Engineering, Agile Project Management, C/C++ Programming in UNIX Environment, Automata Theory, Computer Architecture, Computer Networks, Operating System, Object-Oriented Design
